

Sophomore End of School Year Assessment Study Guide

enVision Algebra 1 and enVision Geometry

Hi guys!!! There will be a sophomore assessment during the last 14 days of the school year! To help you be successful, I have designed this study guide! I want this guide to assist you in remembering skills and processes taught in your Algebra 1 class, in our first semester of Geometry and earlier in our 2nd semester!

These are assignments that are expected to be done outside of the classroom. Scores matter, and will be taken into consideration as points are granted. Each assignment is worth 15 points total, and the quizzes (listed on back side) are worth 25 points. This out of class assignment will be worth at most 525 points, and when you take the end of school year assessment, if you are a sophomore, it will be counted as a test grade. For any other class/grade you will not be penalized for not taking the test!!!

It would be smart to keep a 2nd composition notebook for this purpose only!! If you need one, I will be happy to provide one for you! I will also be keeping a separate composition notebook, so that I can make sure we are covering all the needed information for this assessment!
