

Factor Bingo:

Place 24 of the following answers anywhere you choose on your BINGO CARD. There are more answers than will fit. Just Pick 24 of them and cross them out if you used it. Do this in ink.

You are to factor each problem shown to you. If you find the answer on the bingo card, cover it.

The first person to get a row, column or diagonal is the winner. Of course, it must be correct when I check it.

$(2x+1)(x-3)$	$(x-4)(x-5)$	$(x+3)(x+4)$	$(3x-1)(x+2)$	$2(2x-3)$
$(x-6)(x-6)$	$(x-5)(x+2)$	$(2x-1)(x+3)$	$(x+5)(x-1)$	$(3x-2)(2x-3)$
$2(x+7)(x+1)$	$(x-1)(2x-1)$	$(3x+1)(2x+1)$	$(2x-5)(3x+2)$	$(4x-1)(x-2)$
$(3x-2)(3x+2)$	$(5x-4)(5x+4)$	$(9x-4)(9x+4)$	$(x^2-3)(2x-1)$	$(3x-4)(2x+1)$
$(x^2+1)(x+3)$	$(3x+4)(2x+1)$	$5x^2(x^2-2x+7)$	$4x(3x-2)$	$-3x(2x-7)$
$(x-2)(x+4)$	$(5x-2)(2x-3)$	$(6x-5)(6x+5)$	$5x^2(2x^2-x+1)$	$(x-1)(x-1)$
